

PRODUCT DATA

BLUE OX BAR & CHAIN OIL

DESCRIPTION

Blue Ox Bar & Chain oils are formulated for use in the lubrication of chain saw bars and chains in the logging industry, as well as other applications such as chain drives, ways, slides and guides. These oils are available in three seasonal grades, winter, spring/fall and summer, to meet lubrication requirements of changing climatic conditions throughout the year. Blue Ox Bar & Chain oils are fortified with a tackiness agent to resist sling off, as well as inhibited to prevent wear, rust and corrosion of the bar and chain.

These oils are dyed red to allow for a visual inspection to ensure the chain and bar are being properly lubricated.

RECOMMENDED USES

Blue Ox Bar & Chain oils are suitable for all types of chain saws using either a hand operated or automatic chain oiling system, as well as other applications as stated above.

TYPICAL CHARACTERISTICS

Grade	Winter	Spring/Fall	Summer
Colour	RED	RED	RED
Pour Point (°C)	< -15	< -5	< 0

Manufacturers' recommendations should be consulted when selecting the correct lubricants.
