

PRODUCT DATA

BLUE OX PROCESSOR BAR & CHAIN OIL

DESCRIPTION

Blue Ox Processor Bar & Chain oils are formulated to meet the unique conditions of processor head saws in the logging industry. The viscosity of these oils are specifically selected to ensure proper lubrication and are available in two seasonal grades, Summer and Arctic, to meet the lubrication requirements of changing climatic conditions throughout the year.

Blue Ox Processor Bar & Chain oils are fortified with the tackiness agent to resist sling off, as well as inhibited to prevent wear, rust and corrosion of the chain and bar. These oils are dyed red to allow for a visual inspection to ensure proper lubrication. Blue Ox Processor Bar & Chain oils are also available in Clear for situations where staining may be of concern.

RECOMMENDED USES

Blue Ox Processor Bar & Chain oils are suitable for use on processor saws as well as all other types of chain saws using either a hand operated or automatic chain oiling system where a premium quality product is required.

TYPICAL CHARACTERISTICS

Grade	Summer	Arctic
Color		
Dyed	Red	Red
Clear	Amber	Amber
Pour Point (° C)	0	-25

Manufacturers' recommendations should be consulted when selecting the correct lubricant
